

PolyBot Marketing Pilot

A Two-Week Marketing Experiment tailored for Hong Kong Polytechnic
University Mainland Freshmen.

MARKETING INTERN ASSIGNMENT

Yuyang Zhang

The Opportunity: Information Gap

Newly established Master's programs often lack the robust, mature onboarding ecosystems found in older departments. This creates high friction for incoming mainland students navigating a new campus and city.

- ▶ **Scattered Information:** Guidelines exist, but are buried in long emails or obscure faculty websites.
- ▶ **High Repetition:** University administration faces overwhelming repetition of basic FAQs.
- ▶ **Social Anxiety:** New students hesitate to ask "stupid questions" in massive WeChat groups.
- ▶ **The Void:** A clear demand for an instant, private, and accurate campus knowledge base.

Meet PolyBot

An AI-powered WeChat Concierge acting as a 24/7 virtual senior student. Designed to serve as a high-value Lead Generation tool.

Experiment Architecture

Audience

Incoming mainland postgraduate students at PolyU. Highly motivated, digitally native, heavy WeChat users, actively seeking integration and academic prep information.

Message

"还在新生群里爬楼找链接？添加专属AI学长，秒回理大生存指南！"

(Translation: "Don't scroll through 500 messages to find a link. Add your AI Senior for instant PolyU survival guides.")

Channel

Organic seeding in newly formed major-specific WeChat groups, housing rental groups, and PolyU CSSA (Chinese Students and Scholars Association) forums.

Two-Week Sprint Roadmap

Week 1: Cold Start & Acquisition

- ▶ **Group Infiltration:** Join 10 target WeChat groups manually.
- ▶ **Value Demonstration:** Monitor groups. When a common question arises (e.g., "How to apply for a dorm?"), reply instantly with the exact answer.
- ▶ **The Hook:** Append a CTA:
"我是AI小助手！加我好友，24小时解答新生问题。"
(Translation: "I'm an AI assistant! Add me for 24/7 private Q&A.")
- ▶ **Asset Deployment:** Share a minimalist, meme-style QR code poster in the group on high-traffic evenings.

Week 2: Retention & Iteration

- ▶ **Shift Focus:** Pivot from acquisition to private chat engagement analysis.
- ▶ **Intent Mapping:** Review chat logs to identify top 5 unanswered queries (fallbacks).
- ▶ **Agile Update:** Update the bot's knowledge base and dialogue flow within 48 hours to cover the newly discovered user pain points.
- ▶ **Proactive Push:** Send a single, high-value broadcast message (e.g., "Top 3 things to do before arriving in HK") to test retention.

Draft Creative & Persona

The "Friendly Senior" Persona

The avatar is a stylized, approachable mascot wearing a graduation cap. The tone is casual, helpful, and slightly humorous to lower the barrier of interaction.

Sample Response:

"滴滴! 🚗 连接理大 Wi-Fi 需要使用你的 NetID。默认密码是你的身份证号格式。需要详细的图文配置链接吗? 直接回复「WIFI」即可! "

(Translation: "Beep boop! 🚗 To connect to PolyU Wi-Fi, you need your NetID. Default password is your ID format. Need the exact configuration link? Just reply 'WIFI'!")

Defining Success (KPIs)

CONVERSION RATE

Primary Success Metric

Our core goal is private traffic acquisition. We will measure the ratio of users who add the Bot as a friend versus the total estimated active users in the seeded WeChat groups.

Secondary Metrics:

- ▶ **User Utterances:** Average queries per user per week (Engagement).
- ▶ **Resolution Rate:** Percentage of queries successfully handled without triggering a fallback message (Product Quality).

The Learning Loop

1. Collect Utterances

Monitor raw dialogue inputs during Week 1 to understand exactly how students phrase their problems in natural language.

2. Analyze Fallbacks

Identify where the bot fails. Are they asking about course registration? Visa issues? Categorize these unmet needs rapidly.

3. Optimize Flow

Inject new intents and responses into the backend before Week 2, measuring the subsequent drop in fallback rates to validate learning.

“

Once mature, this isn't just a student tool. It becomes a B2B SaaS offering. We partner with the university to embed PolyBot in official acceptance emails, owning the student onboarding pipeline from day one.

”

FUTURE MONETIZATION & SCALE

Ready for Launch.

Thank you for reviewing my marketing pilot proposal.
